

TRN – SIDESHIFTABLE REAR BLADE

Sideshiftable TRN plow is a multifunctional tool, that can be used as **rear-, side- and underbody plow**. The plow is suitable for **conventional snow removal, roughening of the packed snow** and also for **leveling gravel roads in spring or summer time**. The sideshift function allows the product to be used as a side wing plow to increase the total working width and cut the ridges of snow piles when raised. Plow that is equipped with grader blades and compression cylinder (offered as extra equipment) can be used for lighter grading work.
